

Fill a bag with life saving baby food...the plane is leaving Jan 1st
Baby project...milk, cereals, pablum, children's vitamins
www.projectcolors.com

Hey everyone in Nova Scotia and Florida,

We are going to start a "**New start-baby food project**".

This is a new idea that Charlene and I have come up with to help with the nutritional needs of the babies at the children's home (age 6 month to 3 years old)

Many of the babies are underweight, malnourished and have a condition called fetal alcohol syndrome (among other skin conditions and health problems).

These babies have been feed dirty water from the street most of their lives.

Some of the babies are almost close to death when they arrive at the home. Now that the babies are in the orphanage, the care is much better but they now need extra nutrition to help them grow and become healthy.

In an effort to help tackle this problem, COLORS needs assistance to obtain nutritional foods for the babies. Milk powder, cereals and other special baby foods; items such as these are three times more expensive here in the D.R. then in North America.

Good news:

My mom, Terry Choyce is meeting me for a week in Florida, then I am bringing anything she gets donated back to the D.R.

She is currently collecting this much needed baby food to bring with her. We are hoping to get enough to last the orphanage for at least the next few months to give the babies a jump start in nutrition. "**The New Start-Baby Food Project.**"

We are placing priority on these items so the babies will have a longer term supply of food once COLORS is out of the D.R. in late January (stocking up!).

What to donate:

Powdered baby milk

Pablum

Cereals

Chewable vitamins

***Any light weight baby foods with a high nutritional content**

(Children's light cotton Underwear and Socks are also needed)

What you or your group can do: Collect baby food

If you would like to start a project collecting baby food for the orphanage, please contact: Terry Choyce (Nova Scotia, Canada).
